

Extension of NEW-LINE Fitting Range

The full range of WABCO New Line ABC™ product range provides several benefits compared to the existing range:

Grip then Seal: When connection sealed, no slip out is possible

Check Valve: Integrated security check for correct tube assembly

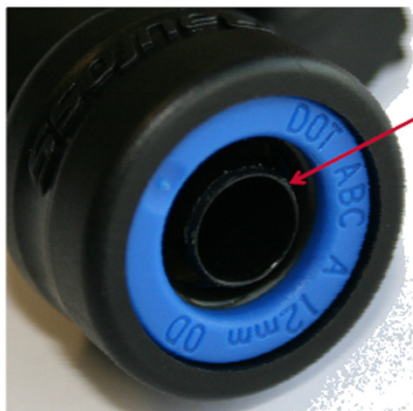

Feedback Signal: Clicking sound on correct tube assembly

Release Tool: Tube can be released by tool, making the fittings re-usable

The existing brass fittings can be replaced by the New Line ABC™ Push-In fitting System.

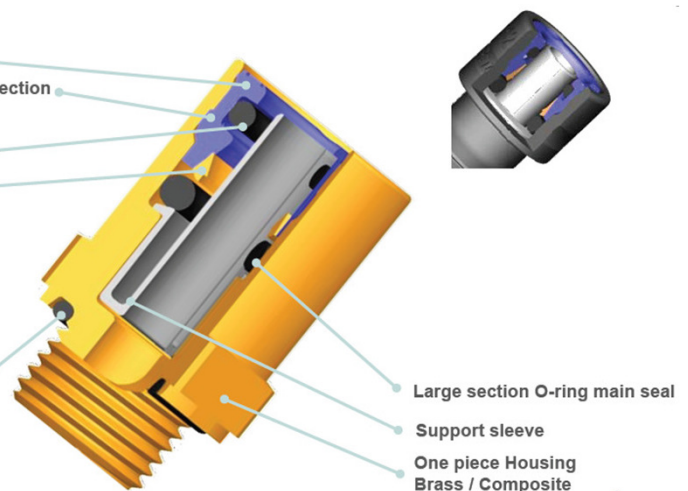

Standard Composite

Tubular stiffener

- Reduced system cost & weight
- Increased Design Flexibility

Cone element
"Ring snap" press connection
Environmental seal
Brass grip ring
